PRODUCTION OF CHOLINE-CHLORIDE APPLICATION BEGUN;
TREATMENT OF MALARIA ORDERED

The Kobanya Pharmaceutical Works has begun the large-scale production of choline-chloride, which is one of the most effective drugs to combat inflammation of the liver. Previously, choline-chloride was used as basic material for other drugs, but now, it is itself used to treat liver ailments. The drug is manufactured from domestic raw materials.

Furthermore, the Ministry of Public Health has ordered that systematic treatment of malaria cases be given each spring. Today, there are 394 malaria cases in Hungary.
